LEVELSHIFT

Unify. Modernize. Transform.

Supercharge your Analytics and AI with Microsoft Fabric + LevelShift

Explore our Fabric Services

Yesterday's insights don't move today's business.

You can't predict what you can't see. With siloed data and ambiguous reports, your innovation is kept on hold.

Fabric puts you ahead of the curve.

With real-time analytics and predictive intelligence, LevelShift builds this very engine that makes it happen compliant, and AI-ready data.

Our Fabric Services

3R Consulting and Implementation Services: Turn your Fabric vision into enterprise reality through strategy-first consulting (for Readiness, Roadblock, ROI Optimization) and execution-ready implementation.

Azure Synapse to Fabric Migration

Achieve a zero-disruption transition from Synapse to Fabric's integrated lakehouse architecture.

Real-Time Intelligence (RTI) Services

Deliver instant insights via live data, real-time mirroring, and AI-powered analytics.

Dynamics 365 and Fabric Integration

Connect Dynamics 365 with Fabric to unify business and analytics data in real time.

Power BI to Fabric Migration

Evolve Power BI estates into governed, scalable Fabric platform ready for AI.

Microsoft Purview Services

Enable end-to-end governance, lineage, and compliance through Purview within Fabric.

AI/ML and Copilot Services

Embed Copilot and AI to predict, automate, and accelerate insights across Fabric.

Successful Implementation
