LEVELSHIFT

Data Compliance & Security

Harness Sensitive Data for AI — Without Compromising Security

WHY IT MATTERS

THE CHALLENGE

When sensitive data is excluded from AI training:

- Models lack business context
- Predictions become generic
- Bias and blind spots increase
- AI initiatives stall in governance reviews
- Data scientists work with incomplete data, limiting innovation.

OUR SOLUTION

LevelShift enables secure, policy-driven data compliance with Perforce Delphix, delivering masked, production-like datasets for AI development. Through automated discovery, classification, and dynamic masking, data teams gain compliant access to realistic datasets without exposing sensitive information.

CHALLENGES WE SOLVE

Risky data slowing your teams?

Non-compliant datasets stall development, testing, and AI initiatives. We deliver virtualized, masked data to keep teams fast and secure.

AI adoption blocked by weak governance?

AI needs large datasets, often with sensitive information. We enforce policy-driven controls within ISMS/AIMS frameworks to keep AI safe.

Regulatory gaps creating exposure?

GDPR, CCPA, and HIPAA risks multiply across environments. Automated compliance checks and audit-ready processes close the gaps.

PROVEN RESULTS WITH PERFORCE DELPHIX

↑40%	↓72%	↓76%
Developer Productivity	**Infrastructure Cost**	**Business Risk**
↑91%	↓73%	↓65%
Quicker Dev Refresh	**Errors per App**	**Downtime**

Full-Lifecycle Perforce Delphix Professional Services

Consultation
Navigate data governance, compliance, and DevOps complexities. We assess risks and design tailored solutions.

License Provisioning
Right-size configurations, select optimal licensing, plan capacity, and leverage reselling options.

Implementation & Integration
End-to-end Delphix deployment, infrastructure, configuration, data integration, AI/ML workflows, and training.

Support & Enablement
24/7 monitoring, troubleshooting, and optimization from certified Perforce Delphix experts.
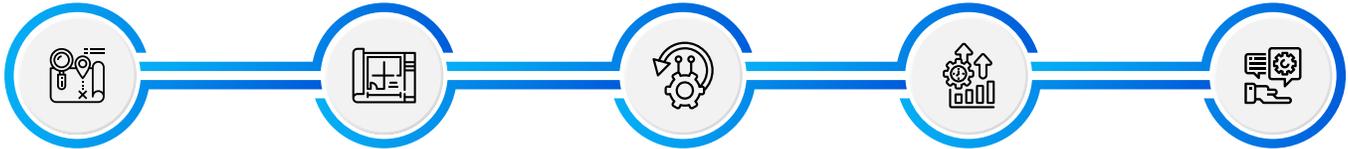

OUR APPROACH

A Phased Path to Compliant Data Operations

Blueprint Architecture
Design Delphix architecture for your Azure/Fabric environment.

ROI & Outcomes
Measure productivity gains, risk reduction, and cost savings.

Discovery & Roadmap
Assess your data landscape and build a compliance roadmap.

Install & Automate
Deploy and automate masking and provisioning pipelines.

Ongoing Support
Continuous monitoring, maintenance, and optimization.

WHY LEVELSHIFT

25+	50+	150+	15+
Years of IT Expertise	Certified Delphix Experts	Microsoft-Certified Engineers	Successful Implementations

- Perforce Global Strategic Partner with a dedicated TDM CoE | Partner of the Year 2024.
- Microsoft Solutions Partner & Fabric Featured Partner at Ignite, FABCON & MS BUILD.
- Full compliance: PII, PCI DSS, CCPA, HIPAA, GDPR, on-prem and cloud.
- Deep expertise in Financial Services, Healthcare, Manufacturing, and more.
- Integrated solution provider for data modernization, governance and AI-ready data.
